

## Features

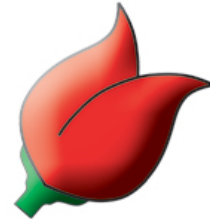

- **Hockey Puck Industrial Underground RF Data Antenna**
  - Heavy-duty design
  - Designed specifically for abusive underground mining environments
  - Hard plastic housing protects antenna element
  - Virtually Indestructible
  - Mounting base is waterproof (prevents water from compromising vital RF communication link)

## Description

The Hockey Puck was developed by Forced Potato to deal with extreme underground mining conditions where water and falling debris often damage or destroy conventional antennas. The tough plastic enclosure of the Hockey Puck is virtually indestructible; allowing the antenna to be mounted almost anywhere on your machine. The mounting base for the antenna features waterproof compression gland fittings that ensure that no moisture interferes with the sensitive RF connections to the antenna.

## Ordering Information

Part Number	Description
L0LG0101	Hockey Puck Antenna UHF
M0LG0500	Hockey Puck Mounting Base and accessories

## Hockey Puck

Industrial Underground RF Data Antenna

Type L0LG

## Typical Applications

- Remote Continuous Miners
- Scoops
- Haulers
- Mobile Roof Supports
