

## Description

The future of mining has arrived with Forced Potato's introduction of armchair mining products for "fly-by-wire" continuous mining. Construction equipment manufacturers have been using chair-based machine controls for a number of years, providing operators with unparalleled comfort and increasing productivity. Forced Potato can provide you with a customized mining "armchair" that "plugs in" to any control system solution.

## Design Your Own Mining Armchair

Have you already dreamed up your ideal armchair for running your mining operation? Contact Forced Potato to discuss your application and together we can build your dream control chair.

## Typical Applications

- Highwall Mining
- Tele-Remote Mining
- Control Rooms
